Enemy Agents?

During March the New York Journal American released a story that affects our survival.

A member of the Russian Secret Police, Lt. Col. Michael Goleniewski, after defecting to the West, has actually named 19 Americans, 12 of them in our State Department, as Communist agents. Several of these people, he states, are in our Central Intelligence Agency and apparently he named these people.

What is being done about this?

To bury the Billie Sol Estes corruption is one thing. Some call this "politics." To stop the investigation of corruption in the Bobby Baker case is another blot on the record of

the present administration and a disgrace to the Democratic party. To bury these cases in a shroud of silence is contemptible.

But the probability of 12 Soviet agents in our State Department with others in our Central Intelligence Agency directly concerns our survival as a free people.

M. M. CHAMPLIN,
Oakland.
